Rishabh Kumar

Senior Software Engineer | Full Stack | Distributed Systems

+91-8077619658 | Rishabh.Kumr@outlook.com

LinkedIn | GitHub | Portfolio

Skills

Languages: Java, Python, TypeScript, JavaScript, SQL

Frameworks: Spring Boot, Spring MVC, Spring Data JPA, Hibernate, FastAPI, Angular

Technologies & Tools: Docker, Kubernetes, Grafana, AWS (EC2, S3, RDS, Lambda, EBS, EKS), Jenkins, Git, Maven, Elasticsearch, Swagger, JUnit, Mockito, Claude, Git, BurpSuite

Databases & Search: SQL, Elasticsearch

Work Experience

Cloud Software Group (InfoScale), *Pune* — *Sept 2023 - Present*

(Formerly Arctera , Formerly Veritas Technologies LLC)

Senior Application Development Engineer (IC3)

Veritas Infoscale Operations Manager (VIOM)

Tech: Java, Spring, Python, C/C++, JavaScript, Jenkins, Kubernetes

- Implemented enterprise feature enhancements for **VIOM 9.1, 9.2 and 9.3** improving **High Availability (HA)**, **cluster** management, **storage** provisioning and **volume** manager failover, and overall platform reliability.
- Independently remediated critical **OWASP** vulnerabilities including **CSRF, XSS, SQL Injection, XXE, SSRF, Shell Injection, Command Injection, RCE,** and **CR/LF Injection**, and addressed security findings from **Mythos/BlackDuck/Mend/DAST.**
- Implemented Threat Model and Custom Reporting features, improving enterprise monitoring and operational reporting.
- Resolved Zero-Day security vulnerabilities within release timelines, strengthening product security and compliance.
- Developed customer-driven product enhancements and platform support, including **RHEL 10** compatibility, improving enterprise deployment flexibility.

Evidence Management and Analysis Platform (EMAP)

Tech: Java, Python, Spring Boot, JavaScript, Elasticsearch, RAG

- Developed intelligent **diagnostics**, **log analysis**, and **automated troubleshooting** modules for enterprise support platforms using **Java**, **Python**, and **Elasticsearch**.
- Built backend services to analyze **Quick Assist** diagnostic logs, automate evidence processing, generate health reports, and provide actionable recommendations using **RAG.**
- Enhanced enterprise scale support efficiency CSAT through AI-driven root cause analysis and automated reporting, contributing to product capabilities supporting products.

- Implemented enterprise diagnostics for Veritas Appliances, large-size log analysis, and network troubleshooting/Analysis , expanding platform capabilities.

Veritas / Arctera Quick Assist

- Developed **self-service diagnostics**, **health checks**, and **configuration validation** features for enterprise customers.
- Built secure services for **log collection**, diagnostic processing, and automated issue detection.
- Implemented intelligent troubleshooting workflows and knowledge-driven recommendations, reducing manual effort and accelerating issue resolution.

Cognizant Technologies, *Pune* *Nov 2022 - Sept 2023*

Programmer Analyst

BBVA (Global Digital Assets)

- Developed and managed **RESTful APIs** using **Spring Boot** and **Hibernate/JPA**, documented with **Swagger** and validated using **Postman**.
- Built a responsive **Single Page Application (SPA)** using **Angular**, developing reusable components and services to consume REST APIs.
- Improved application quality through **JUnit**, **Mockito**, **SonarQube**, and leveraged **Multithreading**, **Collections**, **Generics**, and **Serialization** for scalable application development.
- Deployed the application on **AWS**, hosting the frontend on **Amazon S3**, backend on **Amazon EC2**, and database on **Amazon RDS**.

L&T Infotech, *Mumbai* *Jun 2020 - Nov 2022*

Software Engineer

Global Trading Profit & Loss (GTPL)

- Contributed to the Citi Corp. Global Trading Profit & Loss application by developing **RESTful APIs** using **Spring Framework** and responsive UI components using Angular.
- Contributed to multiple **Java-based microservices** and improved their efficiency by writing unit tests with code coverage of over **90%** using **JUnit** and **JaCoCo**.
- Worked with open-source tools like **SonarQube** to perform continuous code quality inspections, detect bugs, code smells, and identify security hotspots.

Education

University of Petroleum & Energy Studies, *Dehradun* *2016 – 2020*

Bachelor of Technology in Computer Science and Engineering

Publications

Intelligent System for Skin Disease Prediction using Machine Learning

A Smart Approach to Detect Helmet in Surveillance by Amalgamation of IoT and Machine Learning Principles to Seize a Traffic Offender

A Suggested Framework for the Prevention of Physical Attacks on IoT Devices
